showell

GOOGLE USER DATA USAGE ADDENDUM

This document describes the usage of the Google User Data by **Showell Google Drive App**.

This document is an addendum to the general terms and conditions available at
https://www.showell.com/terms-and-conditions.

1. Definitions

"*Supplier*" refers to Showell Ltd.

"Google Drive" refers to the service provided by Google.

"*Service*" refers to the application and platform provided by the *Supplier*.

"*GDrive App*" refers to the application released in Google Cloud Platform including the features of the *Service* required for storing and processing the data. The application is developed and maintained by the *Supplier*.

"*Service*" refers to the application and platform provided by the *Supplier*. The *Service* needs the *GDrive App* in order to be able to access the *User*'s Google Drive.

"*User*" refers to the individual using the *GDrive App* and the *Service.*

2. Use and collection of Google User Data

The *GDrive App* reads information* about user's files in *Google Drive*, including folders. The *GDrive App* doesn't otherwise process (e.g. edit or remove) the existing Google Drive files.

The *GDrive App* uses this data to allow the *User* to easily create new content in *Google Drive* and synchronize the file back to *Service*. Additionally these files can be later edited by the *User* using *Google Drive*.

The *GDrive App* stores only information about files specifically selected by user or created by user using the *GDrive App*.

The *GDrive App* has read-only access to all files accessible by the *User* in *Google Drive*.

---

* File properties processed by GDrive App includes: id, name, mimeType, createdTime, modifiedTime, md5Checksum, capabilities(canDownload), exportLinks, webViewLink and the contents of the file

3. Additional information

Please refer to the General Terms and Conditions for more information about data storage and processing.
